

▪ Suggestions/Observations:

The survey suggested the following points provided by the students:

1. Use of better and more frequent digital technology by the teachers while delivering their lectures.
2. Use of two-way interactions between teacher and student to facilitate better subject-wise topic understanding.
3. Use of motivational skills to encourage the students to attend their classes regularly.
4. To prepare complete questionnaire based on the syllabus prescribed.
5. To reach out to each and every student in order to clear their topic/subject-wise doubts.
6. To organize more awareness programs related to Teaching-Learning process.

According to the responses received from most of the students, they found the Teaching-Learning process to be pretty good in the college, they also expressed that teacher constantly encourages them to study hard and prepare a better career for themselves. Students also were happy and satisfied by the ways in which institution has provided them a platform for the best learning practices.
